

SASS Australian Regional 21st Chisholm Trail 2019

Zero Time Side Matches

You don't have to be a fast shooter to win.
You have to be a consistent shooter to win.

How Zero Time Side Matches will work.

The Shooter can shoot the side match as many times as they like. Once they have a time dialed in they will announce the time by writing it on the board. The shooter then tries to shoot the side match as close to the announced time as they can without going faster.

For example Shooter announces 17.00 seconds.

The Shooter will then shoot the side match.

If the shooter shoots faster (for example 16.5 second) than the announced time they have busted. They are out.

If the Shooter shoots stage in 17.5 seconds the score would be 17.0 +(.5) for the time.

The person that shoots closest to their announced time is the winner.

Zero Time Side Matches:

Zero Time Pistol
Zero Time Rifle
Zero Time Shotgun
Zero Pure Speed
